

The welcome page:

- > Welcomes the user to my website and the theme of it – A neat cartoonish style created via the custom background taken from the official website of Moomin's and an image of Moomins
- > It uses accessibility features like transformation: scale(); css command so of somebody has impairments they can read all the text below the said picture(picture is zoomable too)
- > Uses max-width: 700px and margin: 10px auto; to ensure the text sits in a set place for easy eye access.
- > The <head> section has more accessibility features to ensure good use experience and deeper understanding of what the content of the website is

```

>      <title>Welcome ! </title>
>      <meta charset="UTF-8">
>      <meta name="viewport" content="width=device-width, initial-scale=1.0">
>      <meta name="description" content="welcome page">
>      <meta name="author" content="Weronika">
>      <meta name="keywords" content="welcome,me,more">
```

- > It has a fixed nav bar to ensure usability of the website .that shows clearly where we are and does not switch around pages to not confuse people

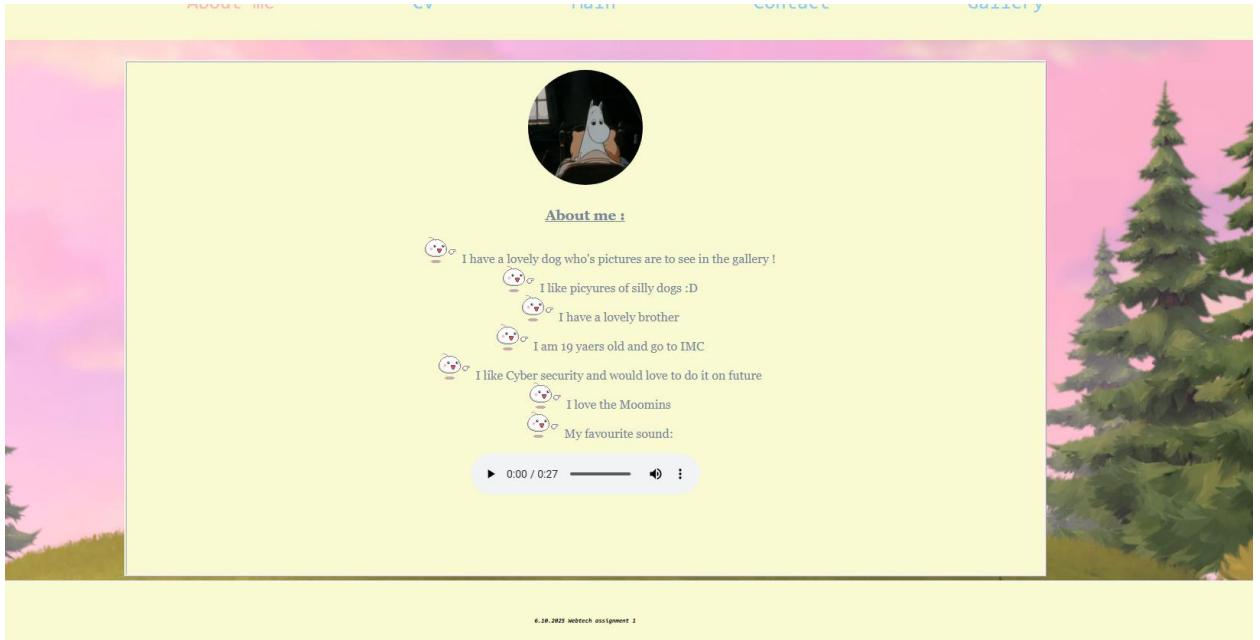

The CV page:

- > Introduces moomin in a official way , showing experience etc.
- > It uses : *display: inline-block;* , *position: relative;* on containers *<div>* to make them go next to each other , also different width value to ensure more can be put in one line
- > All the boxes use *transform:scale()*; to ensure legibility
- > It has a fixed nav bar to ensure usability of the website .that shows clearly where we are and does not switch around pages to not confuse people
- > The *<head>* section has more accessibility features to ensure good use experience and deeper understanding of what the content of the website is

```

>      <meta name="viewport" content="width=device-width, initial-scale=1.0">
>      <meta name="description" content="Ciriculum Vitae of moomin">
>      <meta name="author" content="Weronika">
>      <meta name="keywords" content="CV, cv, moominscv">

```

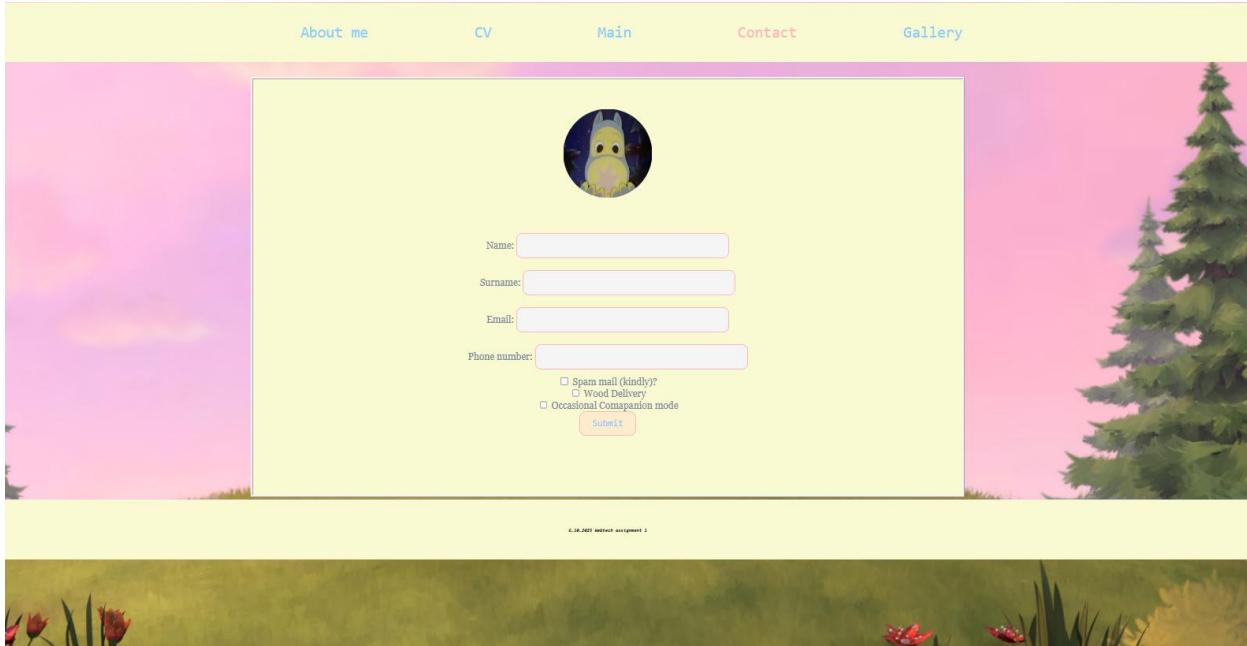

The about me page:

- > Introduces Moomin in a chill way, showing experience etc.
- > Uses a list to do so with a custom pointer ! it also ensures one will look since it moves
- > Utilizes <audio> feature to add to the atmosphere
- > The <head> section has more accessibility features to ensure good use experience and deeper understanding of what the content of the website is

```
>      <title>About me</title>
>      <meta charset="UTF-8">
>      <meta name="viewport" content="width=device-width, initial-scale=1.0">
>      <meta name="description" content="about me page with a picture">
>      <meta name="author" content="Weronika">
>      <meta name="keywords" content="about me, name , age">
>      <link rel="stylesheet" href="CSS/style.css">
```

- > It has a fixed nav bar to ensure usability of the website .that shows clearly where we are and does not switch around pages to not confuse people

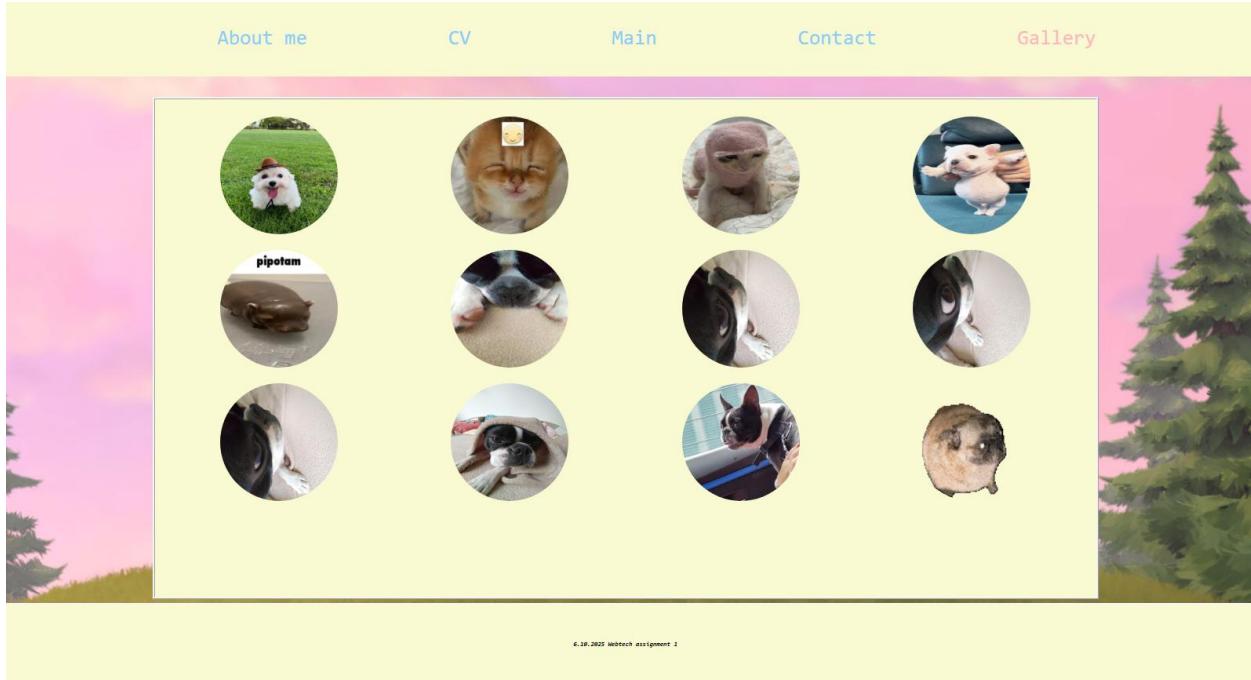

The contact page :

- > Gives a contact option for user
- > Uses forms for input data <form> both text area and checkbox
- > When typing the text area scales up for legibility for impaired people
- > The submit button is fake it's just text with a :hover option but it utilizes links <a> and leads to the Moomin store acts like a button though(.buttonfake the function used)
- > The <head> section has more accessibility features to ensure good use experience and deeper understanding of what the content of the website is

```
>      <title>Conatact me!</title>
>      <meta charset="UTF-8">
>      <meta name="viewport" content="width=device-width, initial-scale=1.0">
>      <meta name="description" content="Conatact moomin personally">
>      <meta name="author" content="Weronika">
>      <meta name="keywords" content="conatctme,makecontact,moomincontact">
>      <link rel="stylesheet" href="CSS/style.css">
```

- > It has a fixed nav bar to ensure usability of the website .that shows clearly where we are and does not switch around pages to not confuse people

The gallery :

- > Shows chosen 10 pictures
- > Pictures utilise `border-radius: 50%`; for neat look
- > `<grid>` css value is used here for neat and clean look of gallery ,so all of them are next to each other and have a set gap between them (padding)

```

>     border-radius: 50%;  

>     /* border-color: lightslategray;  

>     border-style: solid; */  

>     display: block;  

>     margin-left: auto;  

>     margin-right: auto;  

>     padding: 10px;

```

- > The `<head>` section has more accessibility features to ensure good use experience and deeper understanding of what the content of the website is

```

>     <title>Gallery</title>  

>     <meta charset="UTF-8">  

>     <meta name="viewport" content="width=device-width, initial-scale=1.0">  

>     <meta name="description" content="Gallery with circled pictures">  

>     <meta name="author" content="Weronika">  

>     <meta name="keywords" content="pictures,funny,gifs,png,jpg">  

>     <link rel="stylesheet" href="CSS/style.css">

```

- > It has a fixed nav bar to ensure usability of the website .that shows clearly where we are and does not switch around pages to not confuse people
- > All pictures scale(); CSS

REGARDING ALL OF THEM :

- > All use media queries to ensure flexibility to a certain extend
- > All have the same css file to ensure the same look for all
- > All have a footer :D
